

## Kycon introduces Micro USB Connector

Kycon has added a Micro USB B type Connector with through-hole side tabs. The through-hole side tab feature, offers functionality where stability is required for portable devices.

The new connector's smaller footprint and lower profile makes it ideal to use in applications like: smartphones, handheld digital video playback devices and digital video recorders. The standard part come with 30u gold plating with gold flash plating available upon request.

### Key Specifications:

- Stainless steel shell which yields 10k insertion cycles
- Through-hole side tabs for better board stability
- 5 pin, Shielded
- High temperature plastic
- Halogen Free
- RoHS and REACH Compliant

### Part Number:

- KMMX-BSMT35S-B30TR
- KMMX-BSMT35S-BTR
