

Kycon introduces Vertical A Type USB 3.0 Connector

Kycon has added a Vertical A Type USB 3.0 Connector option to increase design flexibility.

The USB 3.0 is also known as *SuperSpeed USB* which supports data transfer rates of up to 10 times faster than the USB 2.0 version and is backward compatible with existing USB devices.

This new USB 3.0 product enhances any device requiring higher speed data transfer such as high-resolution webcams, video surveillance cameras, digital video cameras and external media such as *Blu-Ray* drives.

This new Kycon connector meets the USB Implementers Forum's *SuperSpeed USB* Specification which allows for product inter-operability with existing USB 2.0 products. It also allows users full duplex arrangement data flow.

Key Specifications:

- Vertical, top entry, through hole termination
- Backward and forward compatible to USB 2.0 products
- 9 pin, Blue insulator
- 15u" Gold

Part Number:

- KUSBVX-AS1N9-BL15
