

## IMS Connector Systems recently launched the QLS<sup>®</sup> Advanced – The new Quick-Lock Generation "Made in Germany!"

The newly developed "QLS Advanced" Quick-Lock solution offers a comprehensive range of advanced product features for reliable quick lock interconnection.

This advanced generation is fully backward compatible with the quick lock standard QLS<sup>®</sup>, offered by IMS Connector Systems.

Key factors include: high packaging density, fast & easy assembly and simple installation without the need for tools. The high contact pressure remains unchanged.

### Product Features:

- Excellent Quick-Lock Antenna Interconnection
- Color coding on locking ferrule

- Optical indication "green appearance" when interconnection is accurately locked
- Good PIM behavior through "plastic locking ferrule" compared to metal locking ferrules
- High temperature resistance due to superior material utilization
- Cost efficient quick lock design
