

## FD Series Pushbutton Switches

APEM introduces its latest innovation: the FD series double icon illuminated pushbutton switches. These products complement the existing range of large illuminated pushbutton switches with a new technology that allows the display of two different legends depending on the backlighting colour.

The FD series is ideally suited for integrated designs where additional switches and indicators are no longer necessary.

### Innovative Technology

Designed like a traditional pushbutton, the FD series integrates a technology of superposed filters reacting to green and red light only. This technology allows the display of two different legends depending on the illumination colour.

### Key Features

- Snap-in and threaded bushing models
- Bushing diameter 24 or 26 mm
- Momentary or latching
- Sealing up to IP69K (threaded bushing version)
- Uniform luminosity without hot spots
- Quality of screen printed legends
- 3 standard legends: I/O, START/STOP, ON/OFF – additional legends available on request
