

## A02ES-H Emergency Stop Switches

After the A02ES-I, APEM launches the A02ES-H emergency stop switch with “built-in-safety” design, an exclusivity in the market. If the operator is damaged or if the switch block becomes separated, the circuit will open and the switch will be disconnected from the power supply. No risk of accident in the assembly and maintenance phases. The A02ES-H is approved to EN60947-5-5, EN60547-5-1, UL 508 and CSA.

The A02ES-H emergency stop switch is intended for applications where safety levels are particularly high and regulated: material handling equipment, off-road vehicles and industrial automation.

### Distinctive features

- Bushing dia. 22 mm
  - Optional illumination
  - Push to shut-off, pull or twist to release
  - Current/voltage rating: AC-12, 3A 240VAC / DC-12, 2A 30VDC
  - IP65 front panel sealing
- Mechanical life: 250,000 cycles
