
PC Pendant Controller (Joystick)

New Handheld Device Provides an Immersive and Intuitive method of control. The PC Series was developed to provide a control method that is intuitive and easy to adapt to. Modelled from consumer video game controllers, the familiar design reduces the operator “learning cycle” and quickly increases efficiency and productivity.

APEM's new PC Series is an innovative and ergonomic game style pendant controller. This new handheld device easily accommodates APEM's TS Series miniature proportional joystick and provides either analog voltage or USB output. The PC Series is ideal for controlling unmanned vehicles, robotics and other remote controlled applications.

Distinctive features

- Lightweight, one hand operation
- Excellent proportional control
- Optional sealing up to IP67
- Configured to order (contact factory)
- Readily available in TS series thumbstick and IM series pushbutton configuration
