

RP40-FR Series DC/DC Converters

The RP40-FR series wide range input DC/DC converters have been especially designed for railway applications and are EN50155 certified. They are also UL60950-1 & cUL 60950-1 certified, this makes them ideal for all high input voltage telecom & industrial applications where approved safety standards are require.

Unique Selling Proposition:	Regulated 40W output power Wide 4:1 input voltage range Remote on/off with negative or positive logic EN50155 (railway), UL / cUL 60950-1 certified
Target Customer:	Railway rolling stock Telecom Industrial Applications Distributed power architectures
Main Features:	2" x 1" package Single & dual output options Efficiency up to 92% Output voltage trim -40°C to +105°C operating temperature range Short circuit, over voltage, over load & over temperature protection 3 year warranty
