

KP6 Series Customizable Keypad

Designed for aesthetics & functionality, like the CANbus version launched a few months ago, this new module with standard connection complements the range to effectively meet our customer needs. The KP6 keypad is a quality product available at a reasonable price.

The KP6 keypad features a snap-in housing allowing for quick assembly & installation. With a space-saving surface panel mount, The KP6 keys offer a positive, tactile feedback & quality panel display with many customization options, including special illumination, phantom markings, extra protective coatings & full IP65 panel sealing.

Designed as an alternative to the rocker switch, the KP6 series keypad is ideal in dashboard applications requiring a flush mount plug-and-play solution including material handling, agricultural machinery, heavy duty vehicles & electric cars.

Rated at over 1 million lifecycles, the KP6 series is rich in features & durability.
